WHERE IDEAS STRIKE

11h OJME 2023 concluded successfully. It is impressive to note the level of participation and engagement at the event. The gathering clearly attracted a diverse and international audience, indicating the event's significance in the industry. The event welcomed 225 delegates, representing a broad range of expertise and perspectives, from not just one or two but 11 different countries. With 10 exhibitors showcasing their products and services, the event provided a platform for companies to present their innovations and solutions to a discerning audience. The exhibition attracted a significant crowd with 150 registered visitors. This indicates a high level of interest in exploring the offerings and networking with industry professionals.

Overall, these statistics reflect a well-attended and diverse event, emphasizing its value as a forum for knowledge sharing, networking, and business opportunities in the industry.

It's evident from the detailed overview that the event was not only well-attended but also offered a comprehensive platform for industry professionals to exchange knowledge,

showcase innovations, and discuss crucial topics such as sustainability and decarbonization. The diverse international representation and the presence of key industry players underscore the global significance of the event.

Capt. Mohamed Ali's keynote speech emphasizes the commitment of ADNOC L&S to providing energy with a low carbon footprint. The alignment with ADNOC's goal of achieving net-zero operations by 2045 reflects a forward-thinking approach in the face of the energy transition. The focus on innovation, sustainability, and collaboration is crucial for the offshore industry's future, and the UAE and ADNOC are positioned as leaders in driving this transition.

Oddmund's insights highlight the Middle East's potential to play a central role in providing affordable and sustainable energy. The discussions on sustainability during the plenary sessions further emphasize the industry's commitment to addressing environmental concerns.

Pamela Cordova, Principal Research Analyst, Petrodata Rigs, S&P Global, presentation focused on the aftermath of what Petrodata Rigs by S&P Global calls the Great Jackup Revamp, which is the period in 2021-2022 of sudden jackup demand increase led by National Oil Companies, specially by Saudi Aramco, absorbing a lot of the jackup oversupply and tightening the market. Pamela's presentation demonstrated how jackup utilisation and day rates globally and in the Middle East have reached levels not seen since 2015

Capt Abhay Nimbalkar's moderation of a panel on emissions reduction and sustainability underscores the industry's recognition of the human factor in achieving decarbonization goals. The emphasis on a "Bottom Up" approach involving training and awareness aligns with the idea that individual efforts contribute significantly to overall sustainability.

Zine Delimi's presentation on geotechnical findings provides valuable insights into the challenges faced in the Middle East, particularly regarding the safety of jack-up rigs.

The use of real punch-through case data for refining analytical approaches showcases a commitment to continuous improvement and safety in the industry.

Affan Mustafa's call for collaboration towards decarbonization, digitization, and asset integrity in the Middle East Offshore Market aligns with the broader industry trends and the need for a holistic approach to address evolving challenges.

Overall, the event seems to have successfully facilitated discussions on crucial industry topics, showcased advancements, and fostered a collaborative spirit among industry stakeholders.

Pamela Cordova, Principal Research Analyst – Petrodata Rigs, S&P Global

Pamela Cordova's presentation on the aftermath of the Great Jackup Revamp provides a valuable perspective on the recent dynamics in the jackup drilling sector. The focus on the period of 2021-2022 and the surge in demand led by National Oil Companies, particularly Saudi Aramco, sheds light on a critical phase in the industry.

The absorption of jackup oversupply and the tightening of the market by major players, as illustrated by Pamela, is a significant development. The demonstration of how jackup utilization and day rates have reached levels not seen since 2015 indicates a positive shift in the industry, especially in the context of the Middle East's influence.

The insights on trends in the current drilling upcycle, such as increased contract durations and a rise in rig reactivations and newbuild deliveries, provide a comprehensive view of the industry landscape.

The emphasis on operators securing rigs in the long term suggests a sense of stability and confidence in the sector.

Pamela's specific focus on the Middle East region, highlighting its global influence and dominance in the jackup market, aligns with the broader narrative of the region's strategic importance in the energy sector.

The positive outlook for the jackup drilling sector in the visible future, characterized by strong demand and day rates, indicates sustained growth and opportunities.

In summary, Pamela Cordova's presentation contributes valuable insights into the recent trends and future prospects of the jackup drilling sector, with a particular emphasis on the Middle East's role and influence in shaping the industry's trajectory.

Zine Delimi, Offshore Geosciences Lead, Global Maritime

The presentation showcased the latest findings on the behaviour of spudcans penetrating cemented soil/rock over soft calcareous clays – a stratigraphy commonly encountered in the Middle East.

A detailed analysis was conducted of geotechnical data, examining stratigraphy before and after punch-through incident.

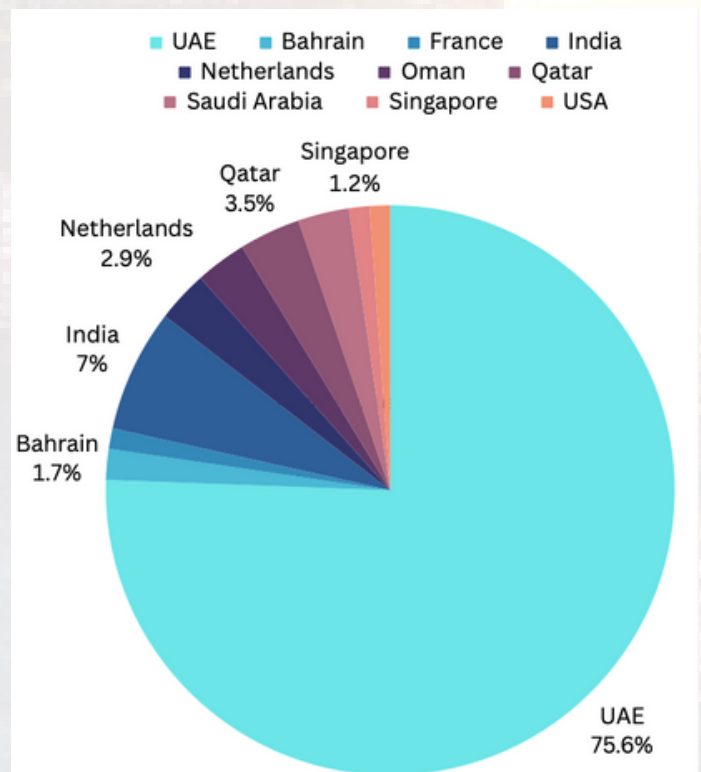

This comparison of virgin soil with soil stratigraphy in seabed depression post PT event provided a good understanding of the behaviour of the plug and the failure of underlying soft soil. The data gathered from real PT case has been invaluable,

not only in validating observations from laboratory and numerical models but also in refining our analytical approach to consider the hard soil plug in punch-through failure mechanism.

This refined modelling has markedly improved our predictions, now closely matching actual penetration records that were previously elusive.

This advancement is of particular importance in the Middle East, where the hard cemented layer over soft calcareous clays poses unique challenges to the safety of jack up rigs during the preloading process

Country Participation -

- EXEMPLARY PERSONNEL ACHIEVEMENT AWARD -

Ramesh Maini, Founder, President, and CEO of Zentech Technical

- Services LIFETIME ACHIEVEMENT AWARD -

R K Mehrotra

- INNOVATION AWARD TECHNOLOGY

Saudi Aramco Safaniya Offshore Producing Department

- OPERATIONAL EXCELLENCE AWARD -

ADNOC Logistics & Services for Complex heavy lift at ADNOC field in DP2 mode

- OILFIELD SERVICE COMPANY OF THE YEAR AWARD

Jacking Solutions

- ENERGY EFFICIENCY AWARD -

VAHANA Offshore

- MARINE SOLUTIONS EXCELLENCE IN HEALTH SAFETY ENVIRONMENT AWARD -

ADNOC Logistics & Services

- TECHNICAL SERVICES AWARD -

Constellation Marine Services LLC

- OJME SPECIAL RECOGNITION AWARD -

Capt. Abhay Nimbalkar for Digital Transformation for his platform SHIPARC.AI

OJME 2023, which was held last week was indeed a very successful event. Came across some insightful presentations and panel discussions. It was indeed a not to miss event.

Affan Mustafa, Syed Business Development Manager, Ocean Tech Solutions

In a gathering of industry leaders, the offshore drilling sector witnessed a significant event dedicated to sharing insights and thoughts. This crucial gathering aimed to highlight the remarkable efforts put forth by operators, contractors, and manufacturers, all working in unison to drive the industry towards sustainability and automation.

Amira Maza, Marketing and Contracts Manager, Noble Corporation

Sea Delta Marine & Offshore Engineering was delighted to participate in the Offshore Jack Up Middle East (OJME) 2023 event held at the Hilton the Palm. We had the pleasure of meeting our esteemed clients and owners of drilling rigs. The event provided valuable insights, and it showcased a promising outlook for the Middle East market.

Sea Delta Marine & Offshore Engineering

Always a pleasure attending the Offshore Jack Up Middle East (OJME) conference and exhibition.

Gaville Dsouza, Chief Operating Officer, Triton Maritime FZE

Trinity Hydraulics was delighted to participate in the Offshore Jack Up Middle East (OJME) 2023 event held at the Hilton the Palm. We had the pleasure of meeting Oil & Gas professionals. (OJME) has been instrumental in facilitating dynamic and enlightening presentations, brimming with vitality and rich in valuable insights.

AlpakChokshi, Sales & Application Manager - Trinity Hydraulic Projects LLC

We would like to express our heartfelt appreciation to Offshore Jackup Middle East and Innovative for organizing yet another incredible event. We are grateful for the opportunity to be a part of this remarkable gathering.

Formura Offshore Services Pvt Ltd

Great event. Thanks to all delegates and Visitors

Derek Conrad Sequeira, Regional Director, Formura Energy Trading and Services

I would like to thank the organizers for this successful event. Their efforts facilitated invaluable discussions among industry peers regarding the challenges facing the jack-up rig industry, particularly in the Middle East.

Zine Delimi, Offshore Geosciences Lead, Global Maritime

The 11th OJME conference and exhibition was a resounding success!! Excellent technical content with all the industry's who's who in attendance, it was a not-to-miss event!

Arun Pushkarna, COO, Vahana Offshore

I want to extend my profound gratitude for the honor of participating in the distinguished panel discussion at the Offshore Jack Up Middle East (OJME) Conference. The event offered an invaluable platform for profound insights and knowledge exchange, and I am deeply appreciative of the opportunity to contribute to the esteemed discussions.

Abdallah Abu Alnaaj Asset Integrity Team Leader, Zakher Marine International

Having recently taken part in the prestigious Offshore Jack Up Middle East (OJME) 2023, we express our deepest gratitude to the event organizers for orchestrating this exceptional gathering, and to all the esteemed leaders who graced our booth with their insights and expertise.

Ocean Tech Solutions

The presentation at the at the Offshore Jack Up Middle East (OJME) 2023 emphasized the alignment of offshore operations with Global Sustainable Development Goals (SDGs) and Environmental, Social, and Governance (ESG) requirements.

Advanced Watertek

I was thrilled to attend Offshore Jack Up Middle East (OJME) 2023 Conference in UAE and meet all our esteemed clients and Offshore Jack up rigs owners, having informative sessions and insights on promising future of offshore drilling market in Middle East region.

Mansour M. Yati, PMP® LD Sales Manager - Marine & Ports Saudi Arabia ABB in Saudi Arabia

Jack ups for rigless well intervention- Another exciting talk and interactive session with a group of Jack up experts. While presenting at the Offshore Jack Up Middle East Conference (OJME) 2023.

Ashik Subhani, Managing Director, Sea Delta Marine & Offshore

Delighted to have represented Maersk Training at day 1 of the Offshore Jack Up Middle East (OJME) 2023.

G Gamboa Higgins Marketing Manager Simulation Division Maersk Training MEA

Grateful for the opportunity to speak at the Offshore Jack Up Middle East (OJME) 2023 Conference, a conference that was truly valuable and informative.

Omar Omran (MIIRSM) SHEQ Team Leader – ADPA / ACSO (OSV), ZMI Holdings

I had the chance to attend Day 1 at the Offshore Jack Up Middle East (OJME) 2023 event. I got to catch up with some familiar faces and keep in touch with important contacts.

Fernando Ortiz | VP Middle East and India, Esgian

Enjoyed catching up with my industry colleagues and friends. This years' sustainability edition was a hit.

Melvin Eldin, Sales Manager – Offshore, Advanced Watertek

Excellent edition, congratulations Mohit Kapoor. Looking forward to attend again next year.

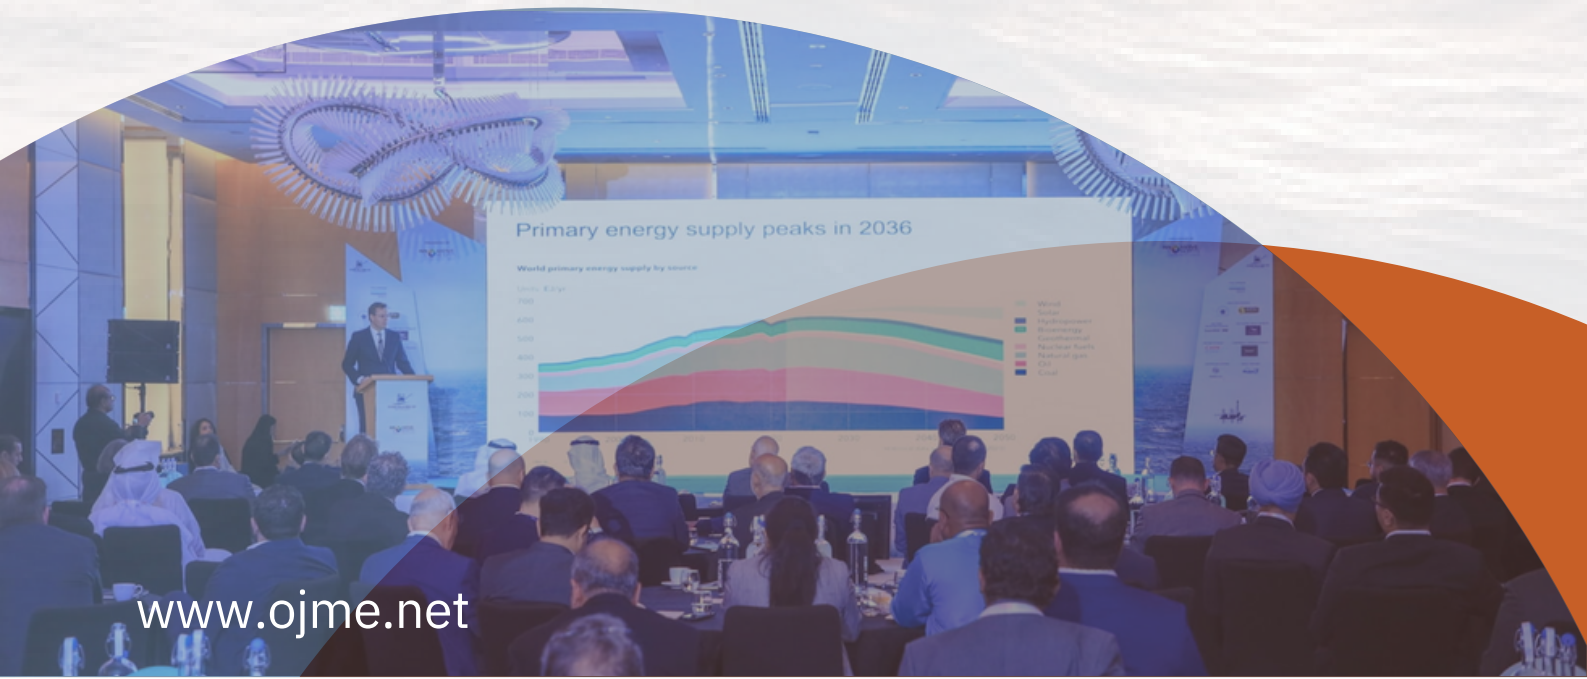

Caroline Perdriset, Business Development Manager, Jacking Solutions

It was my first time attending OJME, and I am glad I got to participate this year.

Jose H. Vazquez, Ph.D. VP Strategic Consulting Services 3Dent Technology – An Ocean Power Technologies Company

Great to be involved and on the Steering Committee for OJME.

Darren MacDonald Chief Operating Officer - MBA - Saudi Aramco Joint Venture (at International Maritime Industries)
